## Profile

I am a self-taught technology enthusiast, driven by relentless curiosity and a fast learning ability. With years of professional programming experience, I have developed a solid mastery of the .NET and NodeJS ecosystem. I am always exploring new technologies, frameworks, and AI-based solutions to enhance my skills and deliver innovative solutions.

## Employment History

**Weduka** - Full Stack Developer - Senior I

September 2023 - Current / Palhoça, Santa Catarina, Brazil.

Working on projects with a microservices architecture, introducing new technologies such as React, Node.js, and Serverless Framework. Additionally, I am exploring and developing AI-driven solutions, with a special focus on WisaAI for Quality Monitoring.

**Weduka** - Full Stack Developer - Mid-level III

November de 2022 - August de 2023 / Palhoça, Santa Catarina, Brazil.

Working on the development and maintenance of the system, while also serving as a technical reference within the team, contributing to the evolution of best practices.

**Weduka** - Full Stack Developer - Mid-level II

September de 2022 - October de 2022 / Palhoça, Santa Catarina, Brazil.

Working on the development and maintenance of the system, while also contributing to the migration and adaptation of the platform to the newly released .NET 7.

**Weduka** - Full Stack Developer - Mid-level I

June de 2022 - August de 2022 / Palhoça, Santa Catarina, Brazil.

Working on the development and maintenance of the system, earning recognition for the quality of the work and taking on the delivery of more complex projects.

**Weduka** - Full Stack Developer - Junior III

May de 2021 - May 2022 / Palhoça, Santa Catarina, Brazil.

Working on the development and maintenance of a system for contact centers, using ASP.NET MVC with .NET Framework to build robust and scalable solutions.

**Sensum** - Junior Software Developer

April 2020 - May 2021 / Itajaí, Santa Catarina, Brazil.

Working on the development and maintenance of an ERP system, using Windows Forms with .NET Framework.

# Education and Certifications

### Bacharelado em Ciência da Computação

In progress

In-person undergraduate course at the Itajaí campus.

### JStack

In progress

Online course of React, React Native, NodeJS, TypeScript and AWS.

### Mastering software testing

Finished in January 2022

Online course on the various types of software testing with a focus on the .NET ecosystem.

### Modeling rich domains

Finished in August 2021

A practical online course focused on building rich, testable entities/domains.

### ASPNET utilizando o padrão MVC

Finished in June 2021

Curso online de ASPNET MVC.

### Software architecture fundamentals

Finished in May 2021

Theoretical online course on software building and architecture.

### JStack PROJECT: Fincheck

Finished

The fincheck is software designed to help users monitor their personal finances easily and efficiently. Using NodeJS, React, PostgreSQL, NestJS, Prisma and JWT

### JStack PROJECT: Serverless + Middy

Finished

This project is a template that builds the basics for creating APIs, using Serverless Framework, NodeJS and Middy.

### JStack PROJECT: Serverless Image Processor

Finished

The project uses a Serverless architecture on AWS, incorporating resources such as API Gateway, S3, Lambda, Lambda Layers and DynamoDB.
